Skills

Programming - Java, .NET and Python

Web Development - JavaScript, TypeScript, React, Angular, HTML and CSS

Database Development

API Development

Project Management

UX/UI Design

Software Testing

Languages

Swedish - Native speaker

English - Fluent(C2 CEFR level)

Spanish - Good knowledge

Danish - Basic knowledge

Work History

2019-05 -
Current

Full Stack Developer

Tetra Pak, Lund

- Part of the 'Student Talent' program at Tetra Pak.
- Worked in software development projects in a team with other students, where, in addition to development, I functioned as Scrum master.
- Tasks included the re-design and development of user interfaces for production machinery, as well as developing a component library for use in web applications.
- Full-stack environment, with focus on React, TypeScript, .NET Core and SQL Server.
- Learned to apply skills taught at school in a work environment. Furthermore, it was educative to work with software development both in a smaller team, as well as in a larger, organizational context.

2017-08 -
2018-12

Senior Private Tutor and Mentor

Allakando, Lund

- Private tutor in mathematics for a student in the 8th and 9th grade.
- During my time as a tutor I developed my pedagogical and motivational skills, both in practice and in theory, by taking several courses to further advance these abilities.

2014-05 -
2018-09

Night Host, Waiter, Kitchen Assistant, Dishwasher

Hotell Gässlingen, Skanör

- Mainly worked as a night host that tended to late arrivals. Since I was alone at the hotel I worked independently at night time.
- Furthermore, I worked in most parts of the organization when needed, which included waiting tables, washing dishes and helping out in the kitchen.

The workload was fairly high, which meant I learned to work in a high pressure environment along with colleagues.

Education

2015-08 -
Current

Master of Science: Information & Communication Engineering

Lund University - LTH

Information and Communication Engineering Technologies deals with information systems in which computers are used for the storage, exchange and efficient transmission of data, often in real time. This includes courses in programming, computer security, database technology, signal processing, digital communications and human-technology interaction.

2012-08 -
2015-06

High School Diploma

St. Petri Scientific Program - Malmö

Additional Experiences

Board member at Västgöta Nation

2020 - current

Västgöta Nation is a student organization, with over 3000 members, that arranges various events for students in Lund. As a board member I worked with the long-term evaluation and development of the organization.

Foreman at Västgöta Nation

2018 - 2020

Working experience with varying responsibilities, from leading bar and restaurant work, to arranging large events for new members of the nation.

Band member

2018 - current

I play various instruments in the resident band of Västgöta Nation.
